

Prescription Drug Misuse

From epidemic to solution

Prescription drug misuse is an epidemic.

Prescription narcotics monitoring programs are effective.

Providers face challenges when implementing prescription narcotics monitoring programs

4

The number of challenges providers face.

1. Establishing standards for monitoring and responses to monitoring
2. Resourcing the additional monitoring tasks
3. Balancing strong patient/provider relationships with monitoring requirements
4. Data management, collecting, tracking, trending, and reporting related outcomes

GuideMed removes those challenges

1

The number of calls needed to solve all four challenges.
